

Project Flow

Date	01 November 2022
Team ID	PNT2022TMID12860
Project Name	Smart Lender - Applicant Credibility Prediction for Loan Approval

- Install Required Libraries
- Data Collection.
 - Collect the dataset or Create the dataset
- Data Preprocessing.
 - Import the Libraries
 - Importing the dataset
 - Understanding Data Type and Summary of features
 - Take care of missing data
 - Data Visualization
 - Drop the column from Data Frame & replace the missing value
 - Splitting the Dataset into Dependent and Independent variables
 - Splitting Data into Train and Test
- Model Building
 - Training and testing the model
 - Evaluation of Model
 - Saving the Model
- Application Building
 - Create an HTML file
 - Build a Python Code
- Final UI
 - Dashboard Of the flask app
